

03

Figure 1 illustrates the development of a 10x10 grid from a single cell. The diagrams are arranged in a 4x3 grid. The first column shows the initial state (a single cell), the second column shows the state after one iteration (a 2x2 grid), and the third column shows the state after two iterations (a 4x4 grid). The diagrams are labeled 1 through 12, with the first three diagrams in each column representing the initial state, one iteration, and two iterations respectively.
